J. Ray McDermott

J. Ray McDermott is a geographically diverse marine energy services company that creates the infrastructure necessary to produce and transport offshore oil and gas. We design, fabricate and install fixed and floating platforms, FPSO topsides and subsea production systems, and we have operations throughout the Americas, Middle East, Caspian and Asia Pacific. Completing J. Ray McDermott's integrated Engineering, Procurement, Construction and Installation portfolio, our Marine division offers a versatile construction fleet of primary and support resources. We offer a wide range of technical and commercial careers, both onshore and offshore, in an international and multicultural environment.

KimleyHorn Internships

Hiring college and graduate students is a key business strategy of KimleyHorn.

As such, we're committed to hiring a significant number of graduating students each year. For example, we hired over 215 students from the classes of 2006 and 2007.

Why such a commitment? We take a long term view of the success of the firm. As such, we recognize that we need to continually add talented and energetic people.

We also believe that internships provide an opportunity for a win win between college students and KimleyHorn.

As such, we offer internships each year. We invite you to apply online for potential internships.

Field Engineer/Project Engineer for Western Summit Constructors, Inc.

Job Location: RM,SE,SW,CA

Number of Openings: 5

Work Schedule: Monday-Friday

Hours Per Week: 45-50

Wage/Salary: N/A

Start Date: May-June

Job Description: Project Engineer (PE's) achieve experience in expediting materials and equipment, while working with other vendors. They are responsible for preparation and review of submittals for equipment, timely arrival of equipment and materials, as well as coordination with field personnel on installation. Project engineers complete O&M manuals and work closely with engineers and owners to execute change orders.

Field Engineers (FE's) are responsible for site and structure layout. They must be able to read drawings and accurately convert the information into a three dimensional structure. Experience using a theodolite, transit and level is required and familiarity with a total station is helpful. FE's work closely with crafts people as quality control and quality assurance personnel. They gain first hand experience in supervising subcontractors.

Application Instructions: you can send in a resume to: www.careers@westernsummit.com

We will be filling interview slots at the CENS career fair on March 8th.
