Scientific Programmer/Applied Mathematician

The US Department of Agriculture, Agricultural Research Service, Grazing lands Research Laboratory, El Reno, OK, invites applications for a Mathematician position GS-1520-07/09/11 (\$35,752 to \$68,787 per annum). We're working to factor climate forecasts and variations into decision support for agriculture and natural resource management. A scientific programmer is needed to assist in this R&D effort, bringing experience applying numerical methods to new problems, managing large data, and performing statistical and graphical analyses. This is a permanent position. US Citizenship is required.

Degree in Mathematics or at least 24 semester hours in mathematics and:

1. Knowledge of mathematical methods and techniques including probability and statistics, linear algebra, calculus, differential equations, and numerical methods.
2. Knowledge of scientific-oriented programming language and scripting language (e.g. C, C++, Java, Perl, Python).
3. Knowledge of basic computer science methods related to scientific applications.
4. Ability to use spreadsheet software with associated analysis and graphics programs.
